Title: OLEFIN POLYMERIZATION CATALYSTS

PROPOSED ADDITIONAL CLAIMS

- 8
25. (now) The process of Claim 20 wherein the olefins are selected from ethylene, alpha-olefin having from 3 to 20 carbon atoms, and combinations thereof.
- 9
26. (now) The process of Claim 25 wherein the polymerization conducted is homopolymerization.
- 10
27. (now) The process of Claim 25 wherein the polymerization conducted is copolymerization.
- 11
28. (now) The process of Claim 25 wherein alpha-olefin is selected from propylene, butene, styrene, diolefins, and combinations thereof.
- 12
29. (now) The process of Claim 20 wherein alpha-olefin is styrene.
- 13
30. (now) The process of Claim 20 wherein the process utilized is liquid phase, high pressure fluid phase, or gas phase.
- 14
31. (now) The process of Claim 20 wherein the polymerization process conducted is selected from slurry, solution, suspension, or bulk phase polymerization.
- 15
32. (now) The process of Claim 30 or 31 wherein the process is employed in series.
- 16
33. (now) The process of Claim 20 wherein the polymer produced has ~~an~~ below about 4.
